PROFILE

Flutter Developer with 3.8+ years of experience in end-to-end mobile application development, including requirement analysis, system design, development, testing, deployment, and maintenance. Proven experience delivering 10+ production-ready cross-platform applications using Flutter and Dart. Strong expertise in Clean Architecture, RESTful API integration, and state management (Bloc, GetX, Provider). Skilled in performance optimization, debugging, and improving application stability and responsiveness. Experienced in publishing applications to Google Play Store and Apple App Store. Strong collaborator in Agile/Scrum environments, delivering scalable, maintainable, and high-quality mobile solutions.

TECHNICAL SKILLS

- Mobile Application Development: Flutter (Android & iOS), Dart, Kotlin, Swift
- State Management: BLoC, Riverpod, Provider, GetX
- Backend: REST APIs, GraphQL, Firebase
- Database: SQLite, Hive, Firestore
- Architecture & UI: Responsive Design, Clean Architecture
- AI Engineering (Foundation Level): Python, Machine Learning, Deep Learning, NLP, LLMs, Prompt Engineering, RAG, AI Agents, LangChain, Vector Databases, OpenAI API
- Tools: Git, GitHub Actions, Jira
- Languages: Dart, Python, Swift, C/C++

WORK EXPERIENCE

Software Engineer

Save The Children International – Gulshan, Dhaka, Bangladesh (December 2023 – Present)

- Architected and deployed 9+ cross-platform Flutter applications including **Ondesk (HRM), Stay Safe, Boxes of Wonder, Your Voice, UFind, Myanmar Cash Distribution, Fleet Management System, Feedback Response Mechanism and Supply Chain Management System** App across Android and iOS platforms.
- Implemented GetX, Bloc, and Provider for scalable state management and improved maintainability.
- Applied Clean Architecture and modular coding practices to enhance code quality and reusability.
- Integrated RESTful APIs, real-time synchronization, and offline support for seamless user experiences.
- Managed app lifecycle including development, testing, debugging, and Play Store/App Store deployment.
- Collaborated in Agile/Scrum environments to deliver responsive and user-focused applications.
- Mentored junior developers and interns, conducted code reviews, and supported team knowledge sharing.

Jr. Programmer

Instasure Ltd – Banani, Dhaka, Bangladesh | (February 2023 – November 2023)

A company specializing in digital insurance solutions and mobile recharge.

- Developed and maintained two high-performance Flutter apps, **Instasure and iFlex**, for Android and iOS platforms.
- Built responsive UI, payment gateways, push notifications, and authentication systems, improving user retention.

EDUCATION

Bachelor of Science in Computer Science & Engineering (CSE)

Bangladesh University, Dhaka, Bangladesh | Jan 2018 – Dec 2021

CGPA: 3.64 / 4.00

TRAINING & CONTINUOUS LEARNING

- AI & Machine Learning Bootcamp (Ongoing): Python, TensorFlow, Neural Networks
- BASIS Mobile App Development Program: Flutter Development

ADDITIONAL INFORMATION

- **Soft Skills:** Ability to adapt to changing environments and manage time effectively, strong problem-solving skills and ability to collaborate effectively within teams,
- **Languages:** English, Bangla

AWARDS

- Received the **Best New Recruit Award** from Save the Children International in 2023 for outstanding contributions and impactful performance as a new team member.

NOTABLE PROJECTS

- **Stay Safe (Safety Alert App)** – Safety alert app for emergency assistance, available on Play Store & App Store
 Link : [Google Play](#) | [App Store](#)
- **Ondesk (HRM App)** – HRM mobile application for workforce management with features like attendance tracking, leave management, meeting room booking, travel requests, and vacancy management.
 Link : [Google Play](#) | [App Store](#)
- **Boxes of Wonder** – Interactive multi-language kids learning app with animations, avatar creation, and painting features to enhance engagement and learning.
 Link : [Google Play](#)
- **Your Voice** – Child-friendly multi-language feedback collection app designed to collect user responses in an engaging and interactive way.
 Link : [Google Play](#) | [App Store](#)
- **Feedback Response Mechanism (Bangladesh)** – Offline and online feedback tracking and response system for collecting, managing, and processing user feedback efficiently.
 Link : [Google Play](#)
- **Instasure** – Customer insurance management mobile application for policy handling, tracking, and service management.
 Link : [Google Play](#)
- **Richi Richi App** – In-house applications for restaurant, featuring GraphQL API integration, GetX state management, and Razorpay payment
- **Chatting App** – Real-time chat application using Socket.io and Telegram API for instant messaging and communication.
- **Hook Store** – E-commerce mobile application for browsing products, managing cart, and placing orders.
